It's 10 out of 10 railtastic!. The game currently offers endless waves of zombies to kill (if you can survive), several areas to unlock per map (there's currently only one map available), a handful of perks and a large selection of guns to purchase. It also has a basic leveling system where you can upgrade things like your health, armor, ammo and sprint ability. The graphics are okay, rather simple, but it does run incredibly smoothly as a result - even with a large horde of zombies chasing after you. With future updates I really think this could turn into a great game, although with that said, even in its current state I think it's easily worth the €0,99. I will be playing more of this, for sure!. Bummer! World War III happened and killed most of the world's population. The ones that got toasted were the lucky ones. Survivors live in constant fear of being murdered or enslaved by violent gangs, renegade military units and, of course; mutants.

Outfitted with a heavily armored car, unlimited firepower and a thirst for vengeance, our Heroine – the Wasteland Angel roams the radioactive wastes, travelling from one God-forsaken town to the next, protecting survivors from being enslaved. She's on a mission, to defend those that can't defend themselves.

Wasteland Angel is a throw-back to the era of vintage arcade shooters, where players fend off waves of enemies and ultimately face-off against epic end-level bosses. From a top-down isometric view, players pilot the Wasteland Angel's overpowered vehicle as its dual machine guns cut a swath across the terrain. To handle whatever the gangs, muties and renegades throws her way, Wasteland Angel has upgradeable weapons and ammo that can rip enemies from this life and toss them into the next.. It's good that they are giving this away instead of selling it. Not worth any money, but a good mission for free.. very retro and very fun, brings back fond meomories of childhood

It's very good. Stealth done extremely well in a way I've not seen since Thief 1 & 2. It uses the perspective well, and involves creative and occasionally frantic use of a large set of tools.. rFactor may seem old, but it's still worth buying on sale. Don't play it without mods.. quote;Average at best, Id give it a miss"

#### PROS:

- In terms of evidence and its storyline its well detailed and interesting
- I quite liked the games atmosphere, it is as described, moody and intriguing
- The soundtrack is so relaxing, I could fall asleep to it
- Its not entirely straightforward allowing for a challenge not all point & clicks provide

#### CONS:

- It looks drab and well below an acceptable standard
- The voice acting is dreadful
- I didn't find it 'funny' instead I thought the script was uninteresting
- The camera was poorly placed in some areas, you are so zoomed out that exploring can be frustrating as its not very responsive either.

#### VERDICT?

I almost recommended this as it was very interactive and didn't hold your hand, along with its atmosphere but ultimately I fell out of touch with this game as its too poorly designed for me to have cared enough to continue. If you really love point & clicks however I'd say go for it at the right price.. This has got to be the worst game I have ever played, it was majorly miss represented on the steam page, for example it doesn't even feel like the game is in alpha, the textures and lighting are crap and look nothing like the gougous scenen shots provided on the store. To make matters worse when I contacted steam they told me that I have already paid for it so I can't get a refund, even though it was grosly miss advertised. Not happy at all with Steam or this company. True to the board game.. I think that I've been spoiled when it comes to Choice games. This game isn't bad on it's own, but when compared to other options it simply falls flat. I often felt a bit railroaded, and that my choices only barely mattered. When the game ended I thought I was only halfway through it, and the ending scene was entirely underwhelming. All in all, kind of a disappointing game.. I got this game today on Steam because I never played it when I was younger, and this game is really fun!

9.5 out of 10. you wanna press the button 100k times and you win. I enjoyed this game, would rate it about 8/10. Looking forward to the following acts, would love to see how the story ends.

There is no voice acting, which shocked me at first but I ended up loving it by the end. Some of the puzzles were quite tricky, others not. I did love the artwork, and the music. This act is a short one, and I got it on sale.
